- Do you think that this is a good thing?
- If you were an ethnic minority person living in another country, eg Israel, where violence was taking place, how would you feel if you lost a relative?

Homework

LESSON GLOSSARY:

Ethnic minority: People of a certain race, religion or nationality who live in a country where the majority of the population belong to a different race/religion/nationality.

For example, white people in India would be considered an ethnic minority just like a person of Indian race would be considered an ethnic minority in Northern Ireland because the people here are mostly white.

Prejudice: When a person dislikes another for no good reason, or has formed a hostile opinion of someone before even getting to know them.

Racism: The belief that one group of people is inferior to another because of the race they belong to.
