

Further to my recent correspondence about the middle of England,
Enclosed a map of England, cut out of an Ordnance Survey atlas.
Please place a finger under the cross marked underneath, you will find
that it balances on Wovley Heath.
Put your finger under Meriden or Morton (or anywhere else for that
matter), the map will simply fall away.
This proves beyond doubt where the centre of England is.
WOVLEY HEATH.
Let the doubters prove me wrong.

Yours truly

Les Singfield
