	Pre-teach essential vocabulary	10	<p>Elicit/present key vocabulary that students need either to understand the key points in the text or to understand and/or answer any questions that you'll set them later in the lesson. The vocabulary is from Words in the News (so you can elicit the vocabulary by using the explanations provided online or below). You could either pre-teach the vocabulary at this stage of the lesson or you could use the vocabulary building activity from further down in this lesson plan.</p> <p>Have students working in small groups together and ask them to try to match the vocabulary with the definitions. Encourage them to work with the other groups to pool their knowledge. When they have done as much as they can, if they have dictionaries, ask them to look up the words to check their answers and to find out the definitions of any words they were not sure of. If they don't have dictionaries, check their answers and give them help with any words they aren't sure of. Whichever method you use to elicit/present the vocabulary, you should then model it (say it clearly, highlighting the word stress) and get them to repeat the words after you.</p>
